

Subject: Longbow Photo Reconnaissance Intel Strike Module (PRISM) Appropriation Title: Aircraft Procurement, Army, 03/05	DoD Serial Number: FY 03-41 IR
	Includes Transfer? No

Component Serial Number: FY 03- 06 IR	<i>(Amounts in Thousands of Dollars)</i>							
	Program Base Reflecting Congressional Action		Program Previously Approved by Sec Def		Reprogramming Action		Revised Program	
Line Item	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount
a	b	c	d	e	f	g	h	i

This internal reprogramming action is required to realign funding provided for the Longbow Photo Reconnaissance Intel Strike Module (PRISM) to the correct budget line for proper execution. This is a congressional special interest item. The realignment does not use general transfer authority and does not change the purpose for which the funds were originally appropriated. This action meets all administrative and legal requirements of the Congress and has not previously been denied by the Congress.

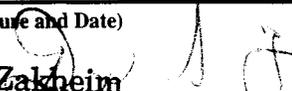

FY 2003 REPROGRAMMING INCREASE: =

Aircraft Procurement, Army, 03/05 =

Budget Activity 2: Modification of Aircraft

Longbow	859,522	859,522	+1,100	860,622
GATM Rollup	75,097	75,097	-1,100	73,997

Explanation: The FY 2003 DoD Appropriations Act (P.L. 107-248) provided \$1.1 million for Longbow PRISM; however, the funds were erroneously placed in the Global Air Traffic Management (GATM) program line. This action realigns the funds to the correct budget line for proper execution. The Longbow PRISM provides communication improvements within the performance envelope of the AH-64D Longbow Apache attack helicopter.
